

### MATERIAL

- Polymer

### COMPATIBLE PRODUCT LINES

- DefendaGuard
- TambourGuard
- EntrexGuard
- TranquilGuard

### OPERATION

- To operate the closure, press the top of the paddle, and the closure will open automatically
- To close the closure, press the bottom of the paddle, and the closure will open automatically
- This paddle switch will control any motorized closure requiring both up and down command

### FEATURES

- CSA and UL approved three position switches
- Designed for use with 120 volt line power and will work with any voltage lower than this level
- Standard switches are momentary operation, meaning that the switch must be activated for the full travel of the door
- Maintained operation is available by special request
- Paddle switch fits into a single gang electrical box and is covered by a single gang cover plate
- These switches fit side by side in a double or triple gang electrical box
- Double gang cover plates are available to cover double gang electrical boxes
